Making new friends may be easy for some people, but for others, it can be the worst part of being in a new place. Luckily, there are a few easy tricks that can help you make friends.

Most of the time, we show how we feel on our faces without knowing it. This means that if we're feeling nervous, we'll probably look that way, too. We should try to show our best side. For example, if we smile, people will think that we're friendlier.

Self-confidence is also important for making new friends. One of the best ways is to wear clothes that both show the real you and make you feel comfortable. Of course, you shouldn't wear pajamas on your first day of school! Just be yourself—in your favorite clothes.

If you don't know how to talk with people you've just met, try asking them some questions about themselves. People usually enjoy talking about themselves. Ask the lady next to you how long she's been at the company. Ask the guy behind you in class what his favorite subject is.

It can take a while for deep friendships to form. Just enjoy the process of making friends.

Are you sending messages and stickers to your friends on LINE now? Do you know you can do more than that with the app? Here are several useful and meaningful uses for LINE.

To begin with, LINE can save your life when you are in serious danger. For example, in 2016, a Taiwanese man almost died after his boat turned over in the ocean. Luckily, he was saved because he sent a message to his friend on LINE before he fell into the water.

LINE can also be used to raise money for those in need. Take the people in Kumamoto (熊本市) for example. Their town was hit hard by two earthquakes in April 2016, and it needed a lot of money to recover from them. Therefore, a set of cute LINE stickers was created. When anyone bought the stickers, the money went to those in need in Kumamoto.

As you can see, LINE is more than just an app for sending messages and stickers. It can also save lives and raise money when it is used wisely.
